

WEICON GmbH & Co. KG

Fast and process-safe

Weicon VA 2407

Weicon, based in Münster, Germany, has developed a colourless and crystal-clear two-component cyanoacrylate adhesive for bonding a wide variety of materials to and with each other – Weicon VA 2407.

Universally applicable

The newly developed adhesive adheres very well to many different surfaces, such as polycarbonate and other plastics, to steel, stainless steel, aluminum, ceramics, glass or even rubber.

The hybrid adhesive is based in part on cyanoacrylate adhesives and combines their speed with the process reliability of 2-component structural adhesives. It can be used universally, has a high adhesive strength and fast curing time.

VA 2407 can be sanded and recoated after approx. 25 minutes. It is resistant to weathering, many aggressive chemicals, impact stress and vibration. It is temperature-resistant from -20 °C to +120 °C. Depending on the geometry of the bond, gaps of up to 5 mm can be bridged with VA 2407.

Due to its fast and impact-resistant curing, it is particularly suitable for bonding plastics and rubber, for example. It can also be used for structural bonding where a coloured adhesive joint would disturb the overall visual impression of the component.

Wide range of applications

With VA 2407, transparent plastics, such as Plexiglas and other materials, can be bonded cleanly and with visually appealing high strength. The adhesive is suitable for a wide variety of applications in plastics technology, mechanical engineering, model and mould making, metal construction, ship and boat building, bodywork and vehicle construction, trade fair and exhibition construction, and many other areas of industry.

Corporate profile:

Since 1947, WEICON GmbH & Co. KG has been producing speciality products for the industry in Germany. The range of products includes special adhesives and sealants, technical sprays and high-performance assembly pastes and greases for all areas of industry - from production over repair up to maintenance. Another field of activity is the development, sales and distribution of stripping tools.

The company headquarters is located in Muenster, Germany. WEICON has subsidiaries in Dubai, Canada, Turkey, Romania, South Africa, Singapore, in the Czech Republic, in Spain and in Italy. The company is represented by WEICON partners in more than 120 countries all over the world.
